

EXPLORATION REPORT
PT Archi Indonesia Tbk.
30th June 2025

PT Archi Indonesia Tbk. (the "Company" or "ARCI") owns 100% of the Toka Tindung Gold Mine, a gold mine located approximately 35 kilometers northeast of the regional capital, Manado, in North Sulawesi, Indonesia, through the Company's wholly-owned subsidiaries, PT Meares Sopotan Mining ("MSM") and PT Tambang Tondano Nusajaya ("TTN").

The Toka Tindung Gold Mine consists of two long-term Contract of Works ("CoWs") covering 39,817 hectares, which cover into two administration areas in North Sulawesi, North Minahasa and Bitung City districts (Figure 1). The CoWs are valid until 2041 and are held by MSM and TTN. Pursuant to the Mining Law Amendment, MSM and TTN have been guaranteed two more extensions of the CoWs in the form of Special Mining Business License/Izin Usaha Pertambangan Khusus ("IUPK"), each for maximum period of 10 years.

Figure 1. Map Location of MSM and TTN's Contract of Works

Exploration activities carried out by the Company, through its subsidiaries, which are MSM and TTN, for the period January to June 2025 were focused on exploration and drilling activities to increase resources and reserves in Eastern Corridor Project and in Western Corridor Project as presented in the map below (Figure 2).

Below are the details of drilling activities for the period of January to June 2025 with total of 190 holes and 40,574.7 meters were as follow:

- In the first quarter, ARCI had conducted drilling at 84 holes with a total depth of 19.833 meters.
- In the second quarter, ARCI had conducted drilling at 106 holes with a total depth of 20.742 meters.

Drilling activities for gold Resource Definition and Exploration, involved Diamond Drilling (“DD”) and Reverse Circulation (“RC”) drilling methods, conducted by PT Maxidrill Indonesia. Details number of drill programs by project and by month, are shown in Table 1.

Table 1. Drilling Results Details for the Period January to June 2025 Based on Prospects and Drilling Types

Period	Diamond Drilling (DD)		Reverse Circulation (RC)	
	Number of Drill Holes	Drilling Meters	Number of Drill Holes	Drilling Meters
1st Quarter 2025	34	10.761,2	50	9.072,0
2nd Quarter 2025	43	10.347,5	63	10.395,0
First Semester 2025	77	21.107,7	113	19.467,0

Total Exploration activities cost for the period January 2025 to June 2025 US\$4,528,416

Based on the drilling results carried out by the Company for the period January to June 2025, the following is a summary of the significant discoveries found:

1. Interval of 18.7m with a gold grade of 6.72 g/t at a depth of 153.7m - 172.4m
2. Interval of 11.1m with a gold grade of 13.66 g/t at a depth of 218.4m - 229.5m
3. Interval of 5.4m with a gold grade of 26.57 g/t at a depth of 232.4m - 237.8m
4. Interval of 28.65m with a gold grade of 4.59 g/t at a depth of 166.75m - 195.4m
5. Interval of 19m with a gold grade of 9.15 g/t at a depth of 174m - 193m
